

## The AUTOPA Road Blocker

Available in lengths of up to 6m, the AUTOPA Road Blocker creates an effective barrier to prevent unauthorised vehicles from accessing a site. This Automatic Access Control system can rise and lower within 9 seconds depending on the variation that is purchased.

The AUTOPA Road Blocker raises and lowers with above ground heights of either 500mm or 1000mm. The top platform has a Aluminium Slip finish preventing people from climbing over when the Road Blocker is raised. The skirt is coated red and white as standard but can be colour coated to any RAL or BS as required (codes must be specified at time of order).

## Product Range

Order Code	Description	Weight
