

The VELOPA Stratford Cycle Compound

The Stratford Compound is a free-standing, secure cycle shelter designed for on site assembly, constructed from galvanised steel and PET sheet. The frame is made from 50mm galvanised mild steel square tube. The roof is 4mm clear sheet. The compound is supplied with end panels for the shelters, one fixed mesh end and one door mesh end. The door is lockable by padlock, or with an optional code keypad system. A central roof section is available as a further option, meaning the Compound can be customised to suit a wide variety of requirements.

Shown is a 4m Stratford coated black (available extra) cycle compound with the optional roof. The cycle storage is provided by two VELOPA Type B cycle racks (available separately) providing a total capacity of 24 cycles.

Product Range

Order Code	Description	Weight
138 204 130	3m Compound	469.0kg
138 204 140	4m Compound	603.0kg

Product details

- 2,150mm (Height).
- 6,500mm (Depth).
- 3,090mm-9,090mm (Length).
- 50mm square galvanised steel tube.
- 4mm clear PET sheet.

Installation & use

Each shelter leg requires bolting down to a suitable concrete surface (not less than 450mm x 450mm x 400mm) by means of four 12mm anchor bolts. The area surrounding the installation must be flat and level with no nearby surface irregularities or gradient changes. On-site assembly requires construction skill. This product is guaranteed for 12 months (if installed and used correctly).
