

AUTOPA Open Spaces Smoking Shelter

Functional and robust in its design, the AUTOPA open spaces Smoking Shelter provides smokers with protection from the elements whilst complying with both UK & Irish regulations. The frame is manufactured from high quality aluminium and the side and roof panels are manufactured from UV stable PET sheet. To comply with smoking shelter legislation, only the top half of the side panels are filled with PET sheet. Powder coated RAL 7016 Grey as standard, the shelter can be coated in any other BS or RAL colour (codes must be specified at time of order).

Available flanged only, the AUTOPA open spaces Smoking Shelter features an adjustable foot to make installation easier on uneven surfaces. Please remember, the location of the smoking shelter in relation to other structures can affect its compliance.

Product Range

Order Code	Description	Weight

Product details

- Overall Height: 2330mm
- Overall Width: 2050mm
- Foot is adjustable by 70mm on each leg.
- Perch bench: 1900mm x 150mm

Installation & use

Supplied in component form for easy installation. Flanged shelters must be bolted down onto a concrete surface (no less than 300mm³) per leg by means of one 10mm anchor bolt. The area surrounding the installation must be flat and level with no nearby surface irregularities or gradient changes. On-site assembly requires construction skill.

This product is guaranteed for 12 months (if installed and used correctly).
