

The AUTOPA Speed Ramp 50

The AUTOPA Speed Ramp 50 is designed to slow traffic to approximately 10mph. Manufactured from recycled, heavy duty PVC, this speed ramp is suitable for wide variety of vehicle types, including heavy goods vehicles with pneumatic tyres up to 44 tonnes. The combination of high contrast black and yellow sections with high visibility reflectors guarantee that the ramp can be seen in even the worst conditions.

AUTOPA's speed ramps are fully modular and created from a variety of sections (each sold separately), allowing any length of speed ramp to be created as required. All shoulders and inners are available in black or yellow; use the chart below to determine the correct number of each required for your site.

Options

Order Code	Description	Weight
138 106 415	Shoulder Section (Yellow)	2.2kg
138 106 418	Shoulder Section (Black)	2.2kg
138 106 420	Inner Section (Yellow)	8.0kg
138 106 425	Inner Section (Black)	8.0kg

Inners	3	4	5	6	7	8	9

Product details

50mm above ground
 400mm wide
 Inner Section: 400mm long
 Shoulder Section: 260mm long

Installation & use

All bolts, fixings and reflectors are included with the ramp segments (bolts provided are suitable for fixing to a concrete surface of at least 100mm thick).
 Due to variable vehicle specifications some 'grounding' may occasionally occur.
 In order to minimise 'grounding' ensure the area surrounding the ramps is flat and level with no nearby surface irregularities or gradient changes.
 This product is guaranteed for 12 months (*if installed and used correctly*).
