

## GFC 4500 Removable Ornamental Bollard

The GFC4500 from AUTOPA is a traditionally styled ornamental bollard designed to resemble its cast iron relative. The body of the bollard is manufactured from mild steel which is galvanised as standard to ensure its longevity. Cast Iron caps and rings are welded on to the steel body to complete the design. Contrasting coatings are available at an additional cost.

The bollards are available in a galvanised and galvanised and coated finish. RAL numbers must be specified at time of order. Eyelets, hooks and chains can be added to these bollards to complete the decorative effect. Please ask for more information.

## Product Range

Order Code	Description	Lift out weight	Weight
138 120 327	Removable (Galvanised)	13.2kg	17.9kg
138 120 328	Removable (Galvanised and Black)	13.2kg	17.9kg

## Product details

900mm above ground  
267mm below ground  
114mm diameter tube  
3mm wall thickness

## Installation & use

Removable bollards require an excavated hole of at least 300mm deep for the socket. AUTOPA recommends that bollards are placed no further than 1,200mm apart to ensure that no vehicle may pass between them. This product is guaranteed for 12 months (*if installed and used correctly*).
