

Type A Cycle Rack Galvanised

The Type A Cycle Rack is a floor mounted cycle rack based upon the Model R Holder. The Type A offers an extremely high double sided cycle parking density. The High and Low holders combined ensure that cycles are parked only 170mm apart (typical parking distance for a Sheffield Cycle Stand is 500mm). The high Holders, which incorporate Ramps are arranged in opposite facing pairs, as are the low holders, this combination ensures that all holders can accomodate bicycles at the same time.

The practical and durable nature of the Type A Cycle Rack ensures that the rack is suitable for all environments where extremely high density of cycle parking is required. All Type A Cycle Racks are made to order only.

<u>Part Number</u>	<u>Description</u>	<u>Weight (kg)</u>
138 200 226	2 Holder Type A Cycle Rack	11kg
138 200 426	4 Holder Type A Cycle Rack	22kg
