

Square RetractaPost-GL 900 (Galvanised)

The AUTOPA Square RetractaPost-GL 900

The Square RetractaPost-GL 900 is a highly effective, heavy duty way to protect entrances to premises from vehicles. The Square RetractaPost-GL 900 is 900mm above ground when raised and is constructed from square galvanised steel tube. Due to the heavy weight of the post, it incorporates AUTOPA's lift assist system which greatly reduces the lift up weight of the product and controls the post during lowering.

When lowered the post is fully below ground and covered using the integral lid. The post is lockable in the raised position by rotating the post 45° and then pressing the high-security push button 7-pin security lock. The post is unlocked using the supplied key, rotated and then lowered. The Square RetractaPost-GL 900 is ideal for the heavy duty protection required for protecting vehicle forecourts, commercial premises and car parks.

Shown is the Square RetractaPost-GL 900 with optional AUTOPA Red & White chevron reflective label.

Product Range

138 810 598	AUTOPA Red & White Chevron Reflective Label

Product details

900mm Tall (When raised).
1250mm Below Ground.
Galvanised or galvanised and coated finish.

Installation & use

It is recommended that posts are placed no further than 1,200mm apart to ensure no vehicle may pass between the raised posts. An excavated hole of approximately 1,400mm deep and 300mm diameter is required for installation. Provision for suitable drainage must be made (chippings or similar) at the bottom of the hole. The uppermost 3-400mm must be concrete. The lid of the post should be no more than 10mm above finished ground level. Keep the sliding post clean and occasionally lubricate the lock with Ambersil 40+ or similar. This product is guaranteed for 12 months (*if installed and used correctly*).
