

The AUTOPA Chamfered Recycled Plastic Traffic Bollard

Manufactured from 100% recycled UV resistant plastic, the AUTOPA Chamfered Recycled Plastic Traffic Bollard is designed to be malleable, but very durable, with a high impact strength.

These round bollards come with three red reflective bands as standard, and are perfect for use in any pedestrian or traffic calming area. The plastic body is impervious to the weather, and is unaffected by frost, rot, and rust. Chemically inert, the bollard is vandal, graffiti and combustion resistant.

Supplied black and ragged as standard, removable versions are also available. Reflective tape can be supplied in any one of six colours; black, blue, orange, red, white and yellow (red as standard, please specify other colours at time of order). Highway Standard reflective bands can replace the existing reflective bands. Please ask for more informatio

Product Range

Order Code	Description	Lift Out Weight	Weight
138 107 061	Chamfered Traffic Bollard (Fixed)		23.0kg

Product details

1000mm above ground. 500mm below ground. 150mm diameter tube.

Installation & use

Ragged bollards require a hole of at least 400mm deep for casting into concrete & are supplied with fixing spikes to ensure firm ground anchorage.

Removable bollards require an excavated hole of at least 300mm square and 400mm deep for the socket
To prevent vehicle access, AUTOPA recommends the distance between bollards does not exceed 1200mm.

This product is guaranteed for 12 months (if installed and used correctly).
