

The AUTOPA City Polyurethane Bollards

The AUTOPA City Polyurethane Bollard has a contemporary design and is ideal for use in urban areas. Best suited for traffic calming and perimeter identification, the City Bollard is available with up to three reflective bands for added visibility if required. Corrosion and shatter proof, this bollard is cast in an engineering grade, heavy duty polymer around a steel core.

Available ragged and black only, the City Bollard is a highly durable alternative to cast iron bollards.

Reflective tape can be supplied in a range of colours (please specify colour at time of order). Highway Standard reflective banding is also available upon request.

Options

Order Code	Description	Weight

Product details

950mm above ground
300mm below ground
145mm diameter tube

Installation & use

Ragged bollards require a hole of at least 300mm deep for casting into concrete. AUTOPA recommends that bollards are placed no further than 1,200mm apart to ensure that no vehicle may pass between them. This product is guaranteed for 12 months (*if installed and used correctly*).
