

The AUTOPA Konus Rubber Bollard

Manufactured from recycled granulated rubber the AUTOPA Konus Rubber Bollard is highly durable and ideal for identifying pedestrian and vehicle areas in busy environments.

The Konus bollard is splinter-proof with no sharp edges, making it safe for pedestrians, cyclists and drivers alike. Its rubber body will flex on impact, before returning to its original position over time. The flexible nature of the bollard means that expensive replacement costs can be avoided should it become deformed.

Supplied flanged only, and in a black finish as standard (a granite finish is also available), reflective tape is available to increase visibility.

Product Range

Order Code	Description	Weight
138 122 025	Konus (Black finish)	17.5 kg
138 122 030	Konus (Granite finish)	17.5 kg

Accessories & installation parts

138 100 968	45mm x 500mm Reflective Tape (please specify colour at time of order).

Product details

740mm above ground
140mm diameter

Installation & use

Requires bolting to a suitable concrete surface of at least 300mm³ by means of six M10 bolts.

Supplied with a steel flange plate for bolting to the ground.

AUTOPA recommends that bollards are placed no further than 1,200mm apart to ensure that no vehicle may pass between them.

This product is guaranteed for 12 months (if installed and used correctly).
