

The VELOPA Boston Cycle Shelter

The Boston Cycle Shelter is a free-standing, single sided cycle shelter designed for on site assembly, constructed from galvanised steel and PET sheet. The Boston Shelter is extremely robust, with 1m wide clear 5mm thick PET roofing sheets that are hugely strong. The frame is constructed from 60mm box section galvanised mild steel.

The Boston Cycle Shelter can accomodate 8 bicycles within the standard 3.3m Main Bay, or 10 cycles in the 4.4m size. Additional Extension Bays can be added to suit on-site needs. The Shelter is also available with lockable 'Zaun' Mesh doors for added security.

The Boston Cycle Shelter is also available in a wide range of colour coating options.

Options

Order Code	Description	Weight
138 200 450	3.3m Main Bay (Flanged)	394.0kg
138 200 460	3.3m Main Bay with Doors (Flanged)	480.0kg

Product details

- 2,200mm (Height).
- 2,460mm (Depth).
- 3,300mm/4,400mm (Length).
- 60mm square galvanised steel tube.
- 5mm clear PET sheet.
- Other options are available; please ask.

Installation & use

Each shelter leg requires bolting down to a suitable concrete surface (not less than 450mm x 450mm x 400mm) by means of 4 12mm anchor bolts. The area surrounding the installation must be flat and level with no nearby surface irregularities or gradient changes. On-site assembly requires construction skill.

This product is guaranteed for 12 months (if installed and used correctly).
