

The VELOPA AX3 Cycle Shelter

The AX3 Cycle Shelter is a free-standing bicycle shelter, with a roof sloping from the front to the back. The AX Shelter is a budget shelter which can trace it's roots back to the 1950's. This simple, functional shelter is constructed of a tubular steel frame with corrugated roof panels. The Shelter can be extended by the addition of extension bays, the shelter is available with Ragged feet for casting into existing concrete or with Flanged feet, for bolting to an existing suitable concrete surface. Side Cladding Panels and Rear Cladding are all available as options to offer greater protection from the elements. The AX2 Cycle Shelter can accomodate up to 10 bicycles with a Type B Cycle Rack.

The Secure Shelter includes the optional Lockable Doors, Guttering Pack and Side and Rear cladding.

Product Range

Order Code	Description	Weight
138 200 018	Main Bay (Ragged)	140.0kg
138 200 016	Main Bay (Flanged)	140.0kg

138 200 053	AX3 Side Cladding
138 200 046	AX3 Rear Cladding
138 200 065	AX2/3 Guttering Pack
138 100 994	M12 Expanding Bolt (3 required per leg)

Product details

2,404mm (Height, Front). 2,210mm (Height, Rear) above ground.
Ragged versions 300mm below ground.
2,440mm (Depth).
3,355mm (Length).

Installation & use

Each shelter leg requires bolting down to a suitable concrete surface (not less than 300mm³) by means of three M12 Expanding bolts. The area surrounding the installation must be flat and level with no nearby surface irregularities or gradient changes. On-site assembly requires construction skill. This product is guaranteed for 12 months (if installed and used correctly).
