

AUTOPA

Lamp Post Protector Galvanised

The AUTOPA Lamp Post Protector is ideal for busy car parks. Designed originally for a major supermarket chain, this post protector will shield lamp posts and other fragile car park furniture from vehicle damage.

Manufactured from galvanised mild steel this protector sits at a car's bumper height and is designed to withstand the knocks and bumps that will inevitably occur.

Available with extended legs for casting into concrete or with a flange plate for bolting down.

These protection hoops can be coated in any RAL colour as required. RAL/BS codes must be specified at time of order.
